AMENDMENTS TO THE CLAIMS

Claim 1 (Currently Amended) A method for inhibiting cell functioning <u>as a target</u> for use in anti-inflammatory <u>therapies and in treating myeloid leukemia in the body and anti-tumor therapies in the body of a warm-blooded living being, which comprises administering to said being a drug comprising, in a quantity effective for said therapies, a substance that specifically recognizes the extracellular domain of SIRP (anti-SIRP substance) and that inhibits the functioning of <u>macrophages microphages</u> by suppressing their activation by a factor of at least 10 as measured by each of the following <u>macrophage microphage</u> activity tests: (i) the production of nitric oxide (NO), (ii) the production of reactive oxygen species, and (iii) the production of tumor necrosis factor-alpha (TNF-α), <u>said anti-SIRP substance being selected from Fab-fragments of monoclonal antibodies and (bio) chemically modified products of such fragments wherein the intended anti-SIRP activity has been maintained pathologic myeloid cells.</u></u>

Claims 2-7 (Cancelled)

Claim 8 (Currently amended) The method as claimed in claim $\underline{1}$ -7, wherein said anti-SIRP substance is a Fab-fragment of monoclonal antibody ED9 or ED17, or said modified product thereof.

Claims 9 and 10 (Cancelled)

Claims 11-14 (Withdrawn)
